SpectraCal C3 Colorimeter
For Use with CalMAN Calibration Software

$149

SpectraCal C3 Key Features

- Supports flat-panel technologies (LCD CCFL, white LED, plasma).

- Excellent speed and accuracy for its price-point.

- Stable at low light measurements.

- 4-Color Correction Matrix (RGBW).

- Advanced filters ensure accuracy and prevent significant drifting over time.

- Easy-to-use counterweight for positioning over flat panels.

- Available bundled with most CalMAN monitor calibration software.

The SpectraCal C3 colorimeter provides highly accurate readings of flat-panel displays, including LCD CCFL, white LED, and plasma. A perfect solution for the budget conscious, the SpectraCal C3 is not only fast, accurate, and compact, but affordable as well.

The SpectraCal C3 has advanced filters, engineered to provide highly accurate readings when compared with any previous generation colorimeter.

The SpectraCal C3 comes bundled with CalMAN for Resolve and CalMAN RGB. While these bundles are designed as low-cost options for studio professionals, they are comprehensive solutions that sacrifice neither accuracy or reliability. When bundled with CalMAN software, the SpectraCal C3 is capable of providing a deltaE of three or below with supported flat-panel display technologies (LCD CCFL, white LED, plasma).
